Boost Productivity and Faster, Easier Clean Up

Iron Bull self-dumping material handling hoppers will help you achieve your goal by keeping waste/scrap materials out of your way.

Iron Bull self-dumping material handling hoppers can greatly enhance your productivity and efficiency. Wood, metal and harness shops, machine shops, construction and agricultural operations can benefit tremendously. Use for handling parts in production, storing product and for waste/scrap collection. Load it up and transport it quickly and easily to deposit material where you want it.

Use Iron Bull for:

- Parts in production
- Wood or metal shavings and punch outs
- Scraps at construction sites
- Glass and stone
- Agricultural industry
- Produce farms
- Scraps from shearing operations
- Floor sweepings
- Building trash / junk

Efficiency is crucial in today's competitive environment.

Our self-dumping hoppers are engineered with maximum ease and efficiency of operation in mind.

Iron Bull's self-dumping hopper **Positive-Alignment-System™** consists of two features that make it both quicker and easier for transport with your forkluck.*

Feature 1

The Tapered Slide Box™ for easy up and down fork alignment. This innovative feature allows the forks on the forkluck to be misaligned up or down and still enter the hopper base without stopping to adjust the fork height.

Feature 2

The base length channel for positive forkluck-to-hopper alignment.

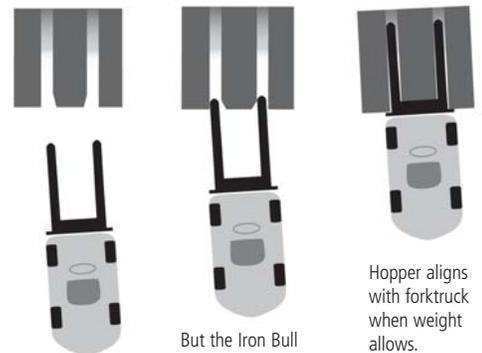

Tapered Slide Box™ for easy forkluck fork alignment

The tapered slide box gives more clearance for easier and quicker fork entry.

Forkluck-to-hopper alignment feature

(Birds eye view diagram)

Here forkluck is misaligned with hopper.

But the Iron Bull forkluck-to-hopper alignment feature helps the operator insert the forks more quickly without additional maneuvering.

Hopper aligns with forkluck when weight allows.

Taken together these two features not only make it faster but also a more pleasant experience for your forkluck operator.

*not available for the 1500lb. economy units

“We use it for shavings and wood chunks.
If we ever need another, it will be an Iron Bull.
I am impressed with the fork alignment feature.
It really works slick.”

— David Yoder, Willowbrook Sawmill, Oblong IL

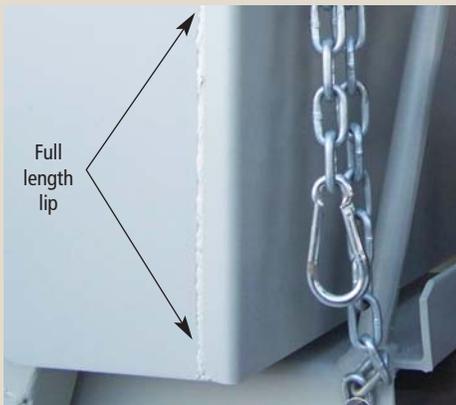

“We clean up quicker, we use it everyday”

— Kevin Wittmer, Peace Valley Cabinets, Montgomery IN

Iron Tough and Bull Strong

Iron Bull offers some of the toughest, strongest self-dumping hoppers on the market today. Check out these heavy duty features.

Wrap around welded lip on back corners increases structural integrity

Standard on all models.

Welded 2" reinforcing angle all along the top edge

Standard on all models.**

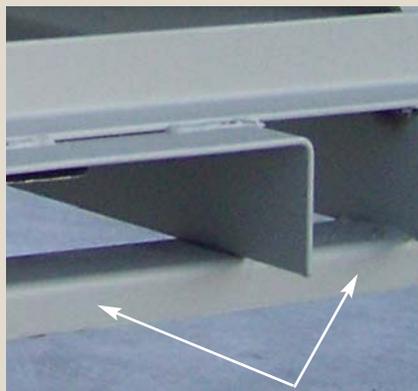

Sides of hopper extend down past hopper bottom for added strength

Standard on all models.

Full length channel base for superior strength**

Base cross tie channel, open face down. Engineered for extra strength as well as preventing build up of debris.

Standard on all models.

Additional welded gusset greatly enhances front corner strength

Standard on all models 1 cu. yd. and larger*

*except for economy models

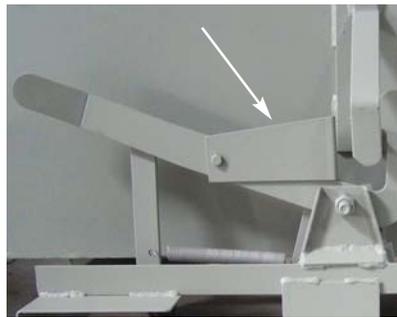

**except 1500lb. economy models

The above 6 features add up to a hopper that will give you years and years of service.

We take safety seriously

The dual safety lock system (consisting of the hopper retaining chain and the safety flip lock) is standard on all models.

Hopper safety retaining chain

When not in transit, the safety chain hooks on the hopper to guard against accidental dumping. When in transit, the safety chain is fastened on the forklift mast keeping the hopper from sliding off when dumping.

Safety flip lock

Hopper cannot accidentally dump when flip lock is engaged.

Bilingual safety labels

All operating instructions and safety decals are in both English and Spanish.

Options:

- Stacking feature
- 1" drainage Hole
- Crane Pick up Eyes
- 3 way fork entry (1/4 to 3 cu yrd. only)
- Hopper Floor lock (for use with casters)

Custom sizes and models available. Call for details.

Specifications may change without notice.

Popular options:

Casters

Ease of movement without using a forklift. Available in steel, phenolic or mold-on rubber.

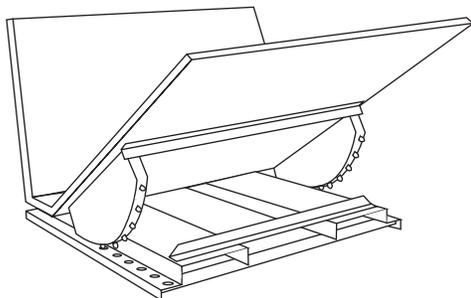

Push handle

Added convenience for moving hopper on casters.

Dump From Seat™ latch rope

This latch rope saves the operator from getting off the forklift to dump the hopper.

Open end self-dumping hopper

Designed for handling long materials. Great for lumber, pipe, storm debris, fencing material and bags of salt, cement and fertilizer, etc.

Paint Color Options:

Iron Bull self-dumping hoppers come standard with a Gray oxide primer. The following colors are available as an option

YELLOW

WHITE

GREEN

RED

BLACK

BLUE
