

# THE BEST MOULDER HOPPER IN AMERICA... IS MADE IN AMERICA

The all-new Z-DRIVE random length hopper is the most effective accessory you can buy for your moulder. The Z-DRIVE combines quick, easy setups with tough durability.

The Z-DRIVE's dual Thompson drive-body travels on case-hardened ways to totally eliminate torque-stress on the drive cylinder. And the Z-DRIVE uses only clean oil-less air throughout its air-logic system to give you year after year of low-downtime performance.

## SPECIFICATIONS

- All up-front gauges and setup controls.
- All oil-free air driven and air logic actuated mechanicals.
- Thompson guide bearings on dual case-hardened ways.
- Damped drive travel.
- Positive-sensing sequencing actuator.
- Speed range: 0-60 fpm (Model 110) / 0-120 fpm (Model 200) @90psi.
- Length range: 10" to ∞ (random).
- Width range: 0.75" to 9.5".
- Thickness range: 0.375" to 5.0".
- Air pressure infeed range: 80-120 psi.

## FEATURES

- Easy installation.
- American components and manufacture.
- Clean, oil-free air logic and air drive systems.
- Extreme durability and reliability.
- Cushioned drive travel for long life.
- Full-range random board length capacity.
- Quick, easy setup.

## WARRANTY

FULL ONE YEAR PARTS WARRANTY COVERAGE  
ON ALL PARTS AGAINST PREMATURE FAILURE.
