

JLT CLAMPS

GLUE APPLICATOR

JLT ROLLER SPREADER MODEL #171B

MEASUREMENTS:

Width: 41" - Height: 34" - Depth: 12"

SPECIFICATIONS:

- Compact and versatile.
- Provides a precise and adjustable glue spread.
- Increases production and decreases clean-up time.
- Stainless steel lid for overnight storage.
- Well suited for coating stock for longer panels and laminations.
- All welded steel construction.
- Ships pre-assembled.

13" Wide felt roller
2 Gallon capacity
Fully adjustable stainless steel doctor roll
Working height of 30.5"
120V/60hz 15 amp motor with safety slip clutch (220v optional)

The pan is stainless steel and the roller felt is replaceable. The adjustable live doctor roll spins in the opposite direction (from the glue roll) which will provide the proper glue spread thickness.

The heavy-duty stainless steel lid allows for easy overnight storage.

Expandable with an optional infeed roller conveyor which are available in 5' or 9' lengths.
